DK-1463 Copenhagen K
Denmark

April 3, 2012

To Whom It May Concern;

The Danish Chamber of Commerce finds a good reason to express its support for the CO2 Green Drive on April 22 in Dakar and help mobilize the Earth for a sustainable future.

The CO2 Green Drive is an organization embedded in the Danish Cultural Institute, which is by all standards a representative pillar of the Danish society at home and more so abroad.

The Danish Chamber of Commerce finds it natural to integrate culture as a powerful vehicle to enable collaboration between citizens, institutions and the private sector in a globalized world where businesses play more and more a leadership role in matters of society.

Danish Chamber of Commerce is proud to work with the Danish Cultural Institute and the CO2 Green Drive in promoting sustainability in Denmark and beyond, providing a window to the world for Danish businesses and taking the lead in facilitating strategic and mutually beneficial partnerships between Senegal and Denmark.

The Danish Chamber of Commerce is one of the largest professional business organizations in Denmark with more than 200 employees, offices in the three major Danish cities, and an EU office in Brussels. The Chamber represents 17,000 Danish companies and 100 trade associations in service sectors such as trade, tourism, business services, IT, welfare services and transport.

Yours sincerely,

Jens Klarskov
CEO of The Danish Chamber of Commerce
